# EDISON K8: 7th Grade Learning Goal

All students will achieve a Student Growth Percentile score of 50% or higher for both ELA and math
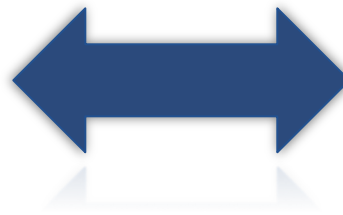

At School

- Teachers will use students' MCAS and September 2014 predictive ANET data as a baseline to track student performance. Data will be posted and students will be given opportunities to reflect on data results

- Teachers will focus on close reading strategies such as annotation and note-taking, and will share best practices across classrooms

- Teachers will encourage and facilitate self-motivation and team-building activities

- Teachers will determine small group intervention strategies, such as station activities and breaking down standards by skills

At Home

- Students should be reading at home every single night– Make it a family routine and read together!

- Spend time together discussing topics your child is interested in learning more about. This will get your child excited about reading!

- Homework, homework, homework! Support your child and make sure they are in a quiet environment where they can focus

- Encourage your child to use specific vocabulary when talking about math and reading

Sample Question to ask:
What did you learn in math class today? How does it connect to what you did in math yesterday?
